## PRODUCT LEADER | SECURITY, AUTHENTICATION, AUTHORIZATION, & IDENTITY PLATFORMS

---

Product leader with 10+ years owning enterprise security, authentication, authorization, and identity access management (IAM) platforms at scale. Deep background in OAuth 2.0, OIDC, token lifecycle management, API security, service-to-service auth, and RBAC / ABAC. Deep expertise translating customer, developer, security, and compliance requirements into scalable platform capabilities across AuthN / AuthZ, enterprise IAM, permissions management, and access governance. Skilled at leading through influence and ambiguity in highly matrixed organizations and aligning Security, Engineering, UX, Legal, and leadership around a unified platform vision.

## TECHNICAL EXPERTISE

---

Authentication & Authorization • Identity & Access Management (IAM) • OAuth 2.0 • OpenID Connect (OIDC) • RBAC / ABAC • Service-to-Service Auth • Enterprise SaaS • Customer Discovery • Security & Trust Platforms • Zero Trust • Consent & Privacy Platforms • Global Regulatory Compliance • Developer Experience (DX) • API Security • APIs & SDKs • AI Governance • Secure AI Adoption • ML-Based Anomaly Detection • Cross-Functional Product Leadership

## PROFESSIONAL EXPERIENCE

---

### Nike, Inc. – Enterprise Identity & Security Platforms | August 2023 – July 2026

*Lead Product Manager* | San Francisco, CA (Remote)

- Owned product vision, strategy, and roadmaps for Nike's global enterprise authentication & authorization platforms, securing consumer & enterprise digital experiences across multi-region enterprise cloud infrastructure
- Managed core identity infrastructure including OAuth 2.0, OIDC, auth services, and identity access management capabilities securing access across global digital platforms and supporting ~\$9B in annual transactions
- Led modernization of identity platforms through implementing granular service-to-service auth capabilities enabling secure, compliant access controls across global ecosystems, unlocking ~\$1.5B in revenue
- Built AI-powered developer integration tooling for security authentication & authorization APIs and SDKs, reduced service misconfiguration risk & support overhead costs while improving implementation speed by 25%
- Partnered cross-functionally with data science and security teams to build ML-driven anomaly detection capabilities, reducing account risk and accelerating threat detection and response times by 50%
- Drove platform modernization to improve scalability, resiliency, and security posture while reducing friction across developer integration flows, achieving 100% company-wide adoption
- Led cross-functional customer discovery efforts with UX, security, and dev platform teams to design DX-focused data access lifecycle workflows for applications, improving security posture by reducing attack surface by 15%
- Reduced supply chain risk by implementing access governance, integration tracking, and lifecycle management controls within an internal platform supporting third-party vendor integrations
- Defined and tracked platform KPIs across adoption, platform usage metrics, developer onboarding, security posture, and risk reduction to guide product investment decisions and roadmap prioritization
- Collaborated cross-functionally with engineering, UX, security, legal, and senior leadership to translate complex data access, security, customer trust, and regulatory compliance requirements into scalable platform capabilities

### Nike, Inc. – Identity, Privacy & Security Platforms | February 2020 – August 2023

*Senior Product Manager* | San Francisco, CA (Remote)

- Managed product vision and strategy for global identity, permissions, privacy, and security platforms, owning account & access foundations powering secure, compliant digital experiences across 50+ international markets
- Designed and shipped scalable consent and permissions management platform enabling users to manage account data privacy and permissions across Nike digital products, unlocking ~\$100M in marketable revenue
- Led cross-functional UX design, development, and rollout of front-end user permissions platform across ~50 regions and languages; balanced compliance, security, trust, and UX goals at global scale
- Drove migration of highly sensitive consumer and athlete identity data, implementing permissions management and secure access controls protecting assets valued at approximately \$80M
- Owned migration and modernization of marketing consent API endpoints, improved platform interoperability and governance controls, driving ~\$30M in incremental revenue
- Partnered closely with Legal, Privacy, Security, Engineering, and UX stakeholders to translate evolving business and regulatory requirements into scalable platform capabilities
- Applied analytics, experimentation, platform telemetry, and operational metrics to drive roadmap prioritization and track compliance and risk reduction initiatives across identity and privacy platforms

## PROFESSIONAL EXPERIENCE (CONTINUED)

---

### **CoStar Group – BizBuySell.com** | October 2016 – December 2019

*Product Manager* | San Francisco, CA

- Owned product vision and roadmap for marketplace platform capabilities serving business buyers and sellers
- Led cross-functional teams to develop API integrations supporting new demand-side product experiences, increasing adoption by 50%
- Managed site product integrations enabling users to advertise across a network of domains and increase impressions, boosting annual revenue by ~\$100K
- Managed A/B tests and ecommerce funnel optimizations, increased conversions by 10% and grew monthly cross-sell subscription revenue by \$30K
- Implemented search and discovery enhancements including advanced filtering and search capabilities improving conversion rates by 6%
- Applied Google Analytics, HEAP, Optimizely, and SQL to validate solutions and guide roadmap prioritization

### **Perricone MD – Ecommerce Platform** | July 2015 – August 2016

*Web Producer* | San Francisco, CA

- Defined product roadmap, drove enhancements based on platform strategy, vision, and user experience
- Led A/B tests and Google Analytics funnels to measure incremental revenue opportunities, increased average order value 20%
- Managed digital support for new product launches, created wireframes and drove design and development work, increased expected ROI by 10%
- Led \$120K CRM implementation resulting in improved email campaign capabilities and boosted monthly revenue by \$30K

### **Genentech, Inc.** | October 2011 – June 2015

*Marketing Web Operations Manager* | South San Francisco, CA

- Owned Salesforce web applications for vendors, gathered requirements and managed Agile engineering projects, exceeded onboarding goals and reduced overhead costs by \$122K
- Partnered with vendors via training initiatives, documentation, and demos to develop platform capabilities for collecting and validating marketing event spend totaling \$5.3M
- Utilized Excel and SQL to create analytics reports, reduced average event costs by \$5K while maintaining 99% data accuracy

## CERTIFICATIONS

---

### **Massachusetts Institute of Technology (MIT)** | October 2024

*Certification in Designing and Building AI & ML Products and Services*

### **Pragmatic Institute** | December 2021

*PMC Level 1 Certification*

### **Product School** | August 2016

*Certification in Software Product Management*

## EDUCATION

---

### **Thunderbird School of Global Management** | May 2010

*MBA in Global Management – Marketing Emphasis*
